

One-Page Overview of the AKAS Full-Chain Resonance Protocol

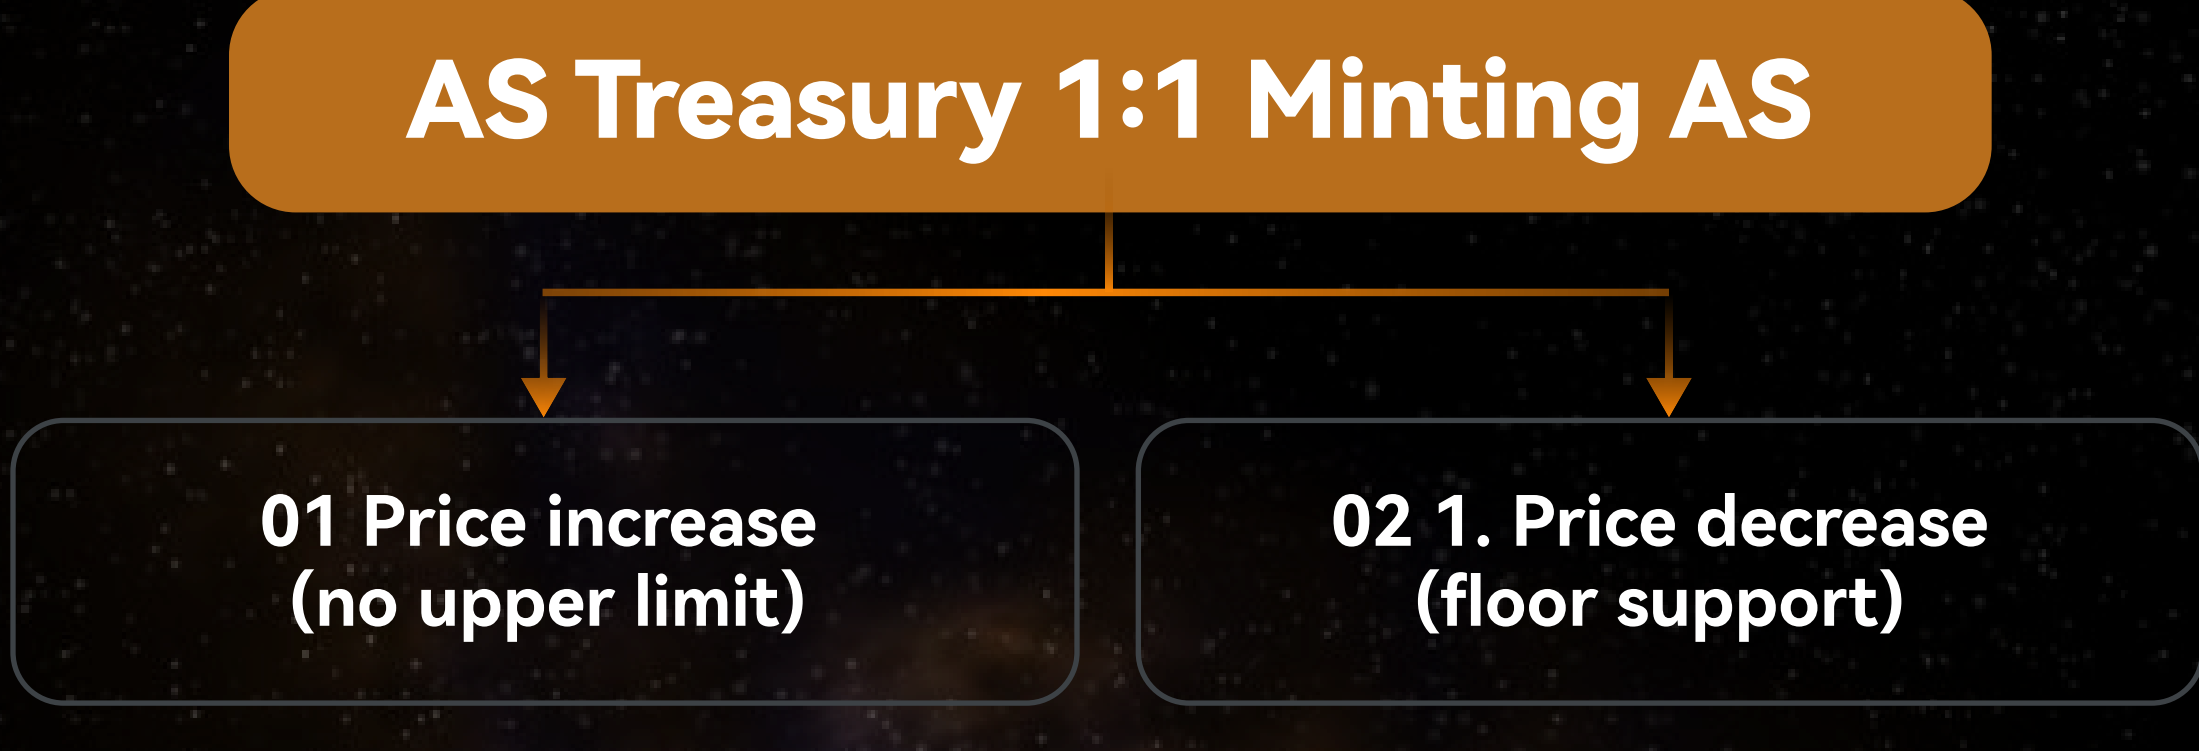

Project Name: AKAS Full-Chain Resonance Protocol
Protocol Logic: A full-chain resonance protocol evolved from the Olympus DAO 4.0 architecture.
Keywords: COC (CO-CREATION) | Fair Launch | LP Lock | Bond Burn
Background: Initiated by a deep web tech team, supported by original members of Olympus DAO as advisors.
Vision: To build a fully decentralized, privilege-free on-chain world.

Participation Entry Illustration:

AS Treasury Minting Logic

Users buy treasury bonds using stablecoins (USDT, DAI). The treasury mints AS as needed. Treasury assets include USDT, DAI, and BTC. If AS price drops below \$1, the system auto-buybacks and burns AS to maintain stability.

Treasury, LP, and Burn Bonds / Block Release Period & Discount Chart

Treasury Bonds: Users purchase treasury bonds; the treasury mints AS as needed, and users receive AS at a discounted price.
LP Bonds: Users purchase LP bonds to deepen AS/USDT liquidity and receive discounted AS.
Burn Bonds: Users purchase burn bonds, which automatically destroy AS to support price increases while granting discounted AS.

Release Period	Bond Discount Range
5 days	95% - 100%
30 days	90% - 100%
90 days	85% - 100%
180 days	75% - 100%
360 days	65% - 100%
480 days	60% - 100%

AS Single-Token Staking / Block Release Period & Yield Bonus Chart

Users can flexibly stake AS tokens to participate in daily rebase events, earning continuous compound rewards and achieving automated compounding of their assets.

Staking Cycle	Daily Rebase Bonus
24 hours	None
30 days	0.05
90 days	0.06
180 days	0.07
360 days	0.08
480 days	0.09

Theoretical Compound Yield Estimation

Rebase Yield	Rebases per Day	Estimated Monthly Yield	Estimated Annual Yield
0.6%	2	42.58%	6,561.26%
0.9%	2	71.37%	69,170.98%

The above figures are theoretical estimates. Actual returns will dynamically adjust based on current holdings, system incentive coefficients, and the debt ratio.

Assuming an initial stake of 1,000 AS, with each rebase yielding 0.6%, the compound interest projection is as follows:

Staking Period	Final AS Amount	AS Valuation at \$100
30 days	1,431.79	\$143,178.84
60 days	2,050.02	\$205,001.81
90 days	2,935.19	\$293,519.21
180 days	8,615.35	\$861,535.27
360 days	74,224.30	\$7,422,430.13

Resonance Reward

Upward & Downward Resonance × 10-Generation Echo × Infinite Growth

Core Function:
New users can earn passive income immediately upon joining.

The smart contract unlocks resonance rewards generation by generation based on the user's AS token holdings and number of direct referrals, targeting upstream and downstream accounts with holdings over \$100.

AS Holdings	Direct Referrals	Unlocked Reward Levels (Up/Down)	Reward Ratio (Up/Down)
\$100	1	1	10%
\$200	2	2	5%
\$300	3	3	3%
\$400	4	4	2%
\$500	5	5	2%
\$600	6	6	2%
\$700	7	7	2%
\$800	8	8	2%
\$900	9	9	1%
\$1000	10	10	1%

Resonance Reward Mechanism Explained

Upward Resonance (1:1 Holding Ratio):
Users can earn a daily yield share from their upline referrers (1st to 10th generation), up to the limit of their own AS holdings.

Downward Resonance (1:N Holding Ratio):
Users can extract daily yield from all AS holdings of their direct and indirect referrals (1st to 10th generation downstream), with no cap.

Example: User A holds \$1,000 worth of AS and has successfully referred 10 users, each holding more than \$100.

A unlocks full 10-generation resonance rewards for both upstream and downstream.

A can earn daily commissions from the AS holdings of their 10 upstream referrers, but only up to \$1,000 worth of AS per referrer. The reward rates per generation are: 10%, 5%, 3%, 2%, 2%, 2%, 2%, 2%, 1%, 1%

The same reward percentages apply to daily earnings from the 10 downstream generations, sharing in their rebase-generated returns.

Title Rewards

Leadership Awakening × Rank Advancement × Universal Council Dividends

Core Function:
Empowers leaders to earn infinite generation income through effective team management.

From Awakener to Overlord, you embark on a journey to lead thousands into battle.

Title Rank	Personal Stake	Direct Referrals	Small Area Volume	Reward Rate	Cosmic Council Dividend
V1: Initiate Awakener	\$1,000	10	\$20,000	15%	-
V2: True Resonator	\$1,500	10	\$60,000	25%	-
V3: Source Echoer	\$2,000	10	\$150,000	35%	-
V4: Saint Guardian	\$3,000	15	\$350,000	45%	-
V5: Crown Resonator	\$5,000	15	\$800,000	55%	-
V6: Crown Dominator	\$10,000	15	\$1,600,000	65%	-
V7: True Black-Silver Dominator	\$20,000	20	\$3,500,000	75%	-
V8: Source Starfield Dominator	\$20,000	20	\$7,500,000	85%	-
V9: Saint Void Dominator	\$20,000	20	\$15,000,000	95%	-
V10: AKAS Consciousness Executor	\$20,000	30	\$30,000,000	105%	1%
V11: Cosmic Primal Council	\$20,000	30	Any 2 legs with V10	115%	2%
V12: AKAS Eternal Council	\$20,000	30	Any 2 legs with V11	125%	3%

Small Area Performance Calculation:
From all your communities, subtract the performance of the highest-performing one. The sum of the remaining communities is counted as your small area performance.

Title Reward Calculation:
Based on the total performance of all communities (including both the large and small areas), the title reward is calculated as a percentage of each Rebase yield.

Referral Reward

One Invite × Infinite Resonance × Lifetime Payback

Core Function:
Refer just one person, and unlock lifetime income with perpetual rewards.
2% Title Reward:
You will receive 2% of the daily title rewards from all qualified title holders (V1-V12) within 10 generations of your referral network.

Accounts without a title are automatically skipped by the contract, not counted in the generation structure, ensuring maximum reward efficiency.

Compressed 10 Generations	Reward Rate
V1-V12	2%

The growth and contributions of every member you refer will continue to echo through you, becoming a perpetual source of income.

Income Tax

Redistribution, Base Activation, and Core Community Stabilization

Core Function: To divert selling pressure and stabilize consensus.

Selection Cycle	Corresponding Tax Rate
5 Days (Fast Release)	15%
10 Days (Quick Release)	10%
15 Days (Classic Release)	5%
20 Days (Awakened Release)	1%

Rebate Reward

Rewarding the Backbone of the Community (V1-V4)

Core Function:
To ensure stable income for the core contributors of the team and enhance community vitality.
Distribution Method:
Distributed once every 15 days, based on weighted performance of small areas among V1-V4 ranked members.
Calculation Formula:
Total Rebate ÷ Total Small Area Performance × Individual's Small Area Performance

Rebate Beneficiary Level	Reward Ratio
V1	40%
V2	30%
V3	20%
V4	10%

Service Award

One Invite × Infinite Resonance × Lifetime Payback

Core Function: To reward direct contributors and recognize every genuine effort made for the community.

Eligible Recipients: V1-V12 members who serve users that have subscribed to AS staking or bond products with a duration of at least 180 days.

Title Level	Subsidy Rate
V1-V12	5%

AKAS Core Advantages

- ✔ **Global Fair Launch**
The AS Genesis Distribution (COC - Co-Creation) is launched simultaneously worldwide. There are no early-stage advantages for whales, no private allocations, and no external bot interference. Every participant starts on an equal footing, ensuring a fair, just, and transparent opportunity to obtain AS genesis shares.
- ✔ **100% Black Hole Destruction of Genesis LP**
All genesis LP bonds are 100% sent to a black hole (permanently destroyed), completely eliminating the possibility of liquidity withdrawal or price manipulation. This provides a solid foundational security guarantee for the long-term value resonance of AS.
- ✔ **Deep Binding of Node Consensus**
All genesis nodes are automatically bound to a 360-day LP bond contract from the start, embedding long-term belief and consensus power, and solidifying the collaborative foundation of the global DAO community.
- ✔ **Burn Bond**
Users purchase burn bonds using USDT. AS is automatically burned, increasing the USDT in the LP pool while reducing the AS supply, thereby driving up the market price of AS. At the same time, users receive discounted AS paid by the treasury. Every burn is a strike against centralized power—destroying base-layer chips and supporting the price.
- ✔ **Principal and Interest Sharing**
Whether through bond purchases or single-token staking, users' principal and interest are released per cycle in sync with the blockchain and can be withdrawn at any time, achieving transparent, on-chain compound returns.
- ✔ **Flexible Deposits and Withdrawals**
Single-token staking: Minimum 24-hour block-explosion cycle; users can withdraw matured principal and interest at any time.
Bond products: Minimum 5-day block-explosion cycle; users can withdraw matured principal and interest at any time.
- ✔ **Evolutionary Logic of Joint Market-Making in DeFi**
In DeFi 2.0, joint market-making was difficult to implement because LP liquidity could be freely added or removed by users, leading to fragile consensus and challenges in sustaining long-term liquidity.
- ✔ **Liquidity is the Lifeblood of DeFi**
In any DeFi project, without liquidity, a token is just hot air. If LPs can be withdrawn, your tokens could become worthless at any moment.
- ✔ **AKAS's Solution: Market-Making Is No Longer a Privilege - Consensus Holders Are the Market Makers**
In AKAS, liquidity does not belong to a central market-maker but to the consensus participants themselves. Genesis LPs are permanently locked and cannot be withdrawn, making every participant a guardian of the price and a market-maker of consensus.

When the era calls for a new order, we no longer wait passively—we choose to forge it with our own hands.
